**Paranormal Activity: Personal Narrative**

The experience suggests the presence of two spirits. This conclusion is further supported through the history of a parent-sibling relationship revealed by the homeowner. While I had many personal experiences, there is very little scientific documentation. The photographic evidence review yielded no confirmation. The audio was contaminated due to the proximity of other investigators and Command Central. There are two videos suggestive of an interaction with the energy contained within the home. There were two primary areas of activity: family room & primary bedroom. I did not feel as if the energy was a threat to the homeowner, however I believe the energy is connected to the homeowner (female) and sister.
